OBJECTIVE

A developer with a passion for programming, and software development. Seeking a challenging position to apply academic knowledge, enhance technical skills, and contribute to innovative projects while gaining practical experience in a dynamic and collaborative environment.

PROFESSIONAL PROJECT

Scynchronized Bidding System
Lead System Developer

- Developed a bidding platform to streamline procurement and drive cost saving through supplier competition
- Designed a system that fosters transparency and promotes price efficiency in vendor selection
- Delivered a fully functional application independently, with minimal assistance from a co-intern
- Contributed to savings of tens of thousands of pesos for the company
- Completed as part of a hands-on internship experience

Truck Management System
Lead System Developer

- Developed a web-based application designed to streamline fleet operations and monitor vehicles and crew activities
- Covered end-to-end logistics workflow from trip booking to proof of delivery (POD) and billing with a focus on real-time trip status tracking
- Focused on accurate trip recording and real-time tracking of trip statuses to ensure transparency and accountability
- Enabled efficient management of trips, personnel, and operational costs within logistics and transportation businesses
- Developed an admin panel with oversight capabilities to monitor trips, personnel, and system activity for accountability and transparency
- System is intended to replace manual tracking with a centralized digital platform

Procurement Management System
Full-Stack System Developer

- Designed and developed a procurement management system independently, covering system architecture, core logic, and implementation
- Implemented end-to-end procurement workflows including purchase requests, approvals, supplier management, and procurement tracking

- Built features to ensure transparency, traceability, and auditability of procurement records
- Developed role-based access controls to support different user responsibilities within the procurement process
- Focused on replacing manual procurement processes with a centralized digital platform to improve efficiency and data accuracy

PERSONAL PROJECT

TillDusk - Social Media Platform
Full-Stack Developer

- Developed and deployed a social media platform inspired by Twitter, enabling users to post stories, save favorites, follow others, and interact within a community
- Built the project from scratch using Next.js, React, Tailwind CSS, Node.js, and Supabase
- Implemented core features such as story posting, favorites management, and user following for engagement and personalization
- Designed a customizable theming system to allow users to personalize their viewing experience
- Focused on responsive design, smooth interactivity, and secure backend integration
- Created as a personal learning initiative to deepen expertise in modern full-stack development and scalable web architecture

ACADEMIC PROJECT

Thesis

Ephphatha - Online Speech-to-Sign Language Translator
Lead Programmer & Team Manager

- Developed a browser-based speech-to-sign language translation system using JavaScript, Web Speech API, and Blender
- Implemented near real-time translation, where speech input is processed and signed after user pauses
- Built a Firebase-powered user authentication, database and learning module for personalized sign language practice
- Animated a custom 3D avatar to perform accurate sign language gestures
- Managed a 4-person team, overseeing development timelines, code quality, and client needs
- Designed to promote inclusion and encourage volunteer participation in the deaf ministry as a pathway to becoming certified translators

SKILLS

Programming Skills: C++, Java, Python, C#
Web Development: HTML, CSS, Javascript, PHP, Next.js, Tailwind CSS
Database: Firebase, phpMyAdmin, Supabase
Tools & Technologies: Github, Git, Visual Studio Code, Blender, XAMPP

EXPERIENCE

System Developer Intern
Producers Connection Logistics Inc. — Feb 2025 - Apr 2025

IT System Developer
Producers Connection Logistics Inc. — May 2025 - Recent

EDUCATION

Bachelor of Computer Science
Systems Technology Institute College Dasmarinas — Sep 2021 - Jul 2025

ACHIEVEMENTS/CERTIFICATION

STI Dasmarinas Campus Week 2024
Cybersecurity 101: Cybersecurity of Everyone — Nov 2024

Oracle Academy
Java Foundation — Jun 2022

TESDA

Installing and Configuring Computer Systems	Nov 2020
Introduction to CSS	Nov 2020
Maintaining Computer Systems and Networks	Nov 2020
Setting Up Computer Networks	Nov 2020
Setting Up Computer Servers	Dec 2020

OTHER INFORMATION

- Age: 22 years old
- Sex: Male
- Citizenship: Filipino
- Residence: Brgy. Tejeros, Makati City, 1204
